

Pituitary Gland p. 499

1. anterior

Growth hormone (GH)/Somatotropin
Prolactin (PRL)
Thyroid-stimulating hormone (TSH)
Follicle-stimulating hormone (FSH)
Adrenocorticotropin hormone (ACTH)
Luteinizing hormone (LH)

2. posterior (produced by hypothalamus)

Antidiuretic hormone (ADH)
Oxytocin (OT) – positive feedback

Thyroid Gland p. 504

Thyroxine (Thyroid hormone – T₃ & T₄)
Calcitonin

Parathyroid Glands p. 506

Parathyroid hormone (PTH)

Adrenal Glands p. 508

1. adrenal medulla

Epinephrine
Norepinephrine

2. adrenal cortex

Aldosterone
Cortisol
Adrenal sex hormones

Pancreas – Islets of Langerhans p. 514

Glucagon
Insulin

Pineal gland p. 515

Serotonin by day/Melatonin by night
Gonadotropin inhibiting hormone (GnIH)

Thymus gland p. 516

Thymosins

Ovaries/Testes p. 516

Estrogen & Progesterone/Testosterone

Hypothalamus p. 500

Somatostatin (SS)
Growth hormone releasing hormone (GHRH)
Prolactin inhibiting hormone (PRLIH)
Thyrotropin releasing hormone (TRH)
Gonadotropin releasing hormone (GnRH)
Corticotropin releasing hormone (CRH)
