

**One of the best places to search: webmd.com**

For each of the following disorders, include the following information (write in note format; you are NOT doing mini-research papers):

Name of the disorder

What its cause is (bacteria, fungus, allergic reaction, etc)

What its symptoms are

What are the treatments/how to prevent it (not brand name or general “lotion”, but rather what is the nature of the ingredient should one be looking for in the listing?)

Other relevant info: ages affected, genders/ethnicities affected – or immune to, etc

**Alopecia** (medical cause for what is happening – don’t just write baldness)

**Psoriasis**

**Athlete’s foot** (tinea pedis)

**Eczema**

**Herpes** (non-STD infection)

**Impetigo**

**Pediculosis**

**Scabies**

**Lyme Disease**

**Rosacea**

**Contact Dermatitis**

**Candidiasis**
