

Welcome to Unit 14 – Review for the AP exam!!

Name _____

This is it! Everything we have been learning leads up to the big test! To help get you ready for the AP exam, I will have you do some mandatory items (in bold) and then you get to choose which items you would like to focus on. **Your grade for this unit will be a total of 60 points:** 10 points for the Write This, Not That FRQs, 10 points for the Thou Shalt Not Forget online quiz, 15 points for the in-class FRQ questions (I will pick the questions, one long and one short. You will answer them and then use remaining class time to practice scoring it up. This will be 5 points each exam day.) From there, YOU decide what you want to do for the remaining 25 points! All you will need to do is prove you have completed the review activity is to show me your work by letting me know of an online score for MC or bringing in the FRQ so I can open up the answer key for you.

Choice Board point values:

A full year's FRQ test - 15 points

Partial FRQ (must include at least 1 long and 2 short questions) - 7 points

MC test (your choice of year, but you must do one full test) – 10 points

The chart below shows your choices as well as some other review items that are available to you. All of these items are to be found in LearnBPS for easy access.

<u>Mandatory: Write This, Not That – 11 FRQs (w/ scoring)</u> (10 points)	<u>Mandatory: Thou Shalt Not Forget – quiz online</u> (10 points)	<u>Lab Procedures to Know – be sure you read!!</u>	FRQ: 3 long, 3 short (in-class) (15 points)	<u>AP Chemistry Poster – linked video & problems from College Board</u>	<u>AP Unit Summary – linked 10-minute video review with Jeremy Krug</u>
